UNITED STATES FOREIGN TRADE

SUMMARY REPORT FT 930_E

JULY 1961

FOR RELEASE September 7, 1961

BUREAU OF THE CENSUS

Richard M. Scammon, Director

EXPORT TRADE BY COMMODITY

The Bureau of the Census, Department of Commerce, announced today that the decrease in United States exports of domestic merchandise from \$1,677.9 million in June to \$1,617.3 million in July¹, a drop of about four percent, reflected lower levels of exports of all of the economic classes of commodities. The July domestic merchandise export total was also about four percent below the \$1,682.0 million reported for July 1960. include data on M.S.P. (military) exports. These totals

With M.S.P. (military) shipments excluded, exports of domestic merchandise during July amounted to \$1,538.7 million, about five percent below both the June total of \$1,622.8 million and the July 1960 total of \$1,611.8 million.

Exports of finished manufactures fell from \$982.0 million in June to \$940.9 million in July. This change reflected a substantial drop in exports of aircraft, parts and accessories, from \$132.8 to \$89.9 million and less noticeable decreases in from \$132.8 to \$89.9 million and less noticeable decreases in exports of automobile parts for assembly and replacement, from \$41.5 to \$36.7 million; tractors, from \$18.3 to \$14.2 million; power generating machinery, from \$21.1 to \$17.2 million; and agricultural machines, implements and parts, from \$14.3 to \$10.6 million. These decreases were partly offset, however, by increases in exports of commercial motor trucks and busses, from

1 See the July 1961 issue of Report No. FT 900-E for seasonally-adjusted figures on total exports, excluding M.S.P. (military) shipments. Seasonallyadjusted data are not available on a commodity basis.

\$23.8 to \$33.9 million; office, accounting, and computing machines and parts, from \$23.5 to \$30.6 million; and construction, excavating, mining, oilfield, and related machinery from \$63.1 to \$68.4 million. The drop in exports of semimanu-factures from \$290.4 to \$279.6 million was largely due to a decrease in exports of "other iron and steel semimanufactures" (principally steel scrap), from \$56.2 to \$38.7 million, which was partly offset by a rise in exports of coal-tar and other cyclic chemical products, from \$13.3 to \$18.4 million.

From June to July, exports of <u>crude foodstuffs</u> declined from \$144.5 to \$139.6 million owing chiefly to decreases in exports fo corn, from \$26.1 to \$21.1 million; fresh or frozen fruits, from \$14.5 to \$11.7 million; and "other grains" (except thest). wheat), from \$13.1 to \$13.7 million. Exports of wheat, also included in this economic class, rose from \$78.9 to \$87.5 million. Exports of manufactured foodstuffs decreased slightly from \$94.7 to \$91.0 million as a drop in exports of refined vegetable oils, fats and waxes, from \$12.3 to \$5.8 million was offset in part by an increase in exports of wheat flour, from \$6.2 to \$10.5 million. Although the level of exports of crude materials remained about the same. \$166.2 million in July as compared to \$166.3 million in June, noticeable counterbalancing changes occurred in exports of some of the individual items included in this economic class. Decreases in exports of coal, from \$33.1 to \$26.3 million, and oilseeds, from \$26.2 to \$23.1 million were largely offset by an increase in exports of unmanufactured cotton, from \$36.7 to \$45.4 million.

EXPLANATION OF STATISTICS

COVERAGE: Export statistics include government as well as non-government shipments to foreign countries. The export statistics, therefore, include Mutual Security Program military aid, Mutual Security Program economic aid and Department of the Army Civilian Supply shipments. Separate figures for Mutual Security Program military aid are shown in the footnotes of this report. Shipments to United States armed forces and diplomatic missions abroad for their own use are excluded from export statistics. United States trade with Puerto Rico and United States possessions is not included in this report, but the export trade of Puerto Rico with foreign countries is included as a part of the United States export trade. Merchandise shipped in transit through the United States between foreign countries is not included in export statistics.

VALUATION: The valuation definition used in the export statistics is the value at the seaport, border point, or airport of exportation. It is based on the selling price (or cost if not sold) and includes inland freight, insurance, and other charges to the port of exportation. Transportation and other costs beyond the United States port of exportation are excluded. However, in some instances the valuation may not be reported in accordance with this definition, particularly where the export value is difficult to determine or must be estimated. None of the values have been adjusted for changes in price level.

EFFECT OF SAMPLING: The value of export shipments individually valued at \$100-\$499 (about five percent of total export value) is estimated by sampling. Effective with the statistics for January 1960, the previous sample ratio of 10 percent has been increased to a 50 percent sample for countries other than Canada with the 10 percent sample being retained for Canada. The estimated values are distributed among the individual comprobable variability due to sampling is less than \$50,000 or less than a trivial negertors which less than a trivial percentage which can be ignored. For periods prior to 1960, the probable variability due to sampling is less than \$50,000 or less than two percent of the individual totals shown. The largest variation from rounding of figures is \$50,000. For further information regarding sampling procedures, see the September 1953, February 1954, January and June 1956, and the October-December 1959 issues of Foreign Trade Statistics Notes.

Further information regarding coverage, valuation, etc., is contained in the "General Explanation" in foreword of Report No. FT 410. For complete statement, see foreword in Foreign Commerce and Navigation of the United States.

UNITED STATES EXPORTS OF DOMESTIC MERCHANDISE, BY ECONOMIC CLASSES AND LEADING COMMODITIES: JULY 1961 AND SELECTED PERIODS

(Quantities in units indicated; values in millions of dollars. Figures for 1961 are as originally issued and have not been revised to include published corrections. Figures for 1960 include revisions published with the December 1960 reports, or earlier, but do not include revisions published during 1961. Totals represent sum of unrounded figures, hence may vary slightly from sum of rounded amounts. See "Explanation of Statistics" for information on sampling procedures and effect thereof on data shown.)
